

INON

INON M67-XD Mount Converter

Thank you for purchasing INON product.

The INON *M67-XD Mount Converter* is dedicated optional part to attach INON close-up lens with M67 screw mount (*UCL-330, UCL-165M67* etc.) on INON "XD Mount".

Not compatible with a wide conversion lens with M67 screw mount (*UWL-95S M67* etc.)

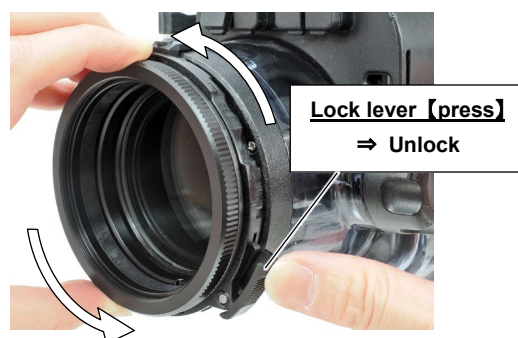

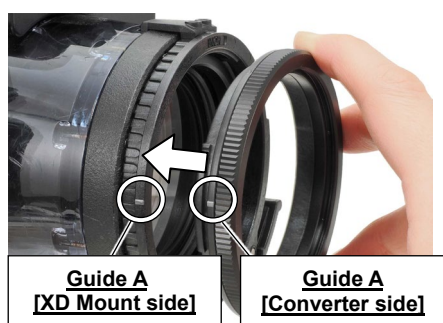

- Compatible product:** (As of October 2021)
- Subject side
 - INON M67 series close-up lens
 - Camera side
 - INON XD Mount for PT-056/058/059
 - INON XD Mount for URX100A

- ★ Using this product will have significant vignetting on image corners with/without a lens on land and underwater at zoom range from wide end to middle. Zoom to telephoto side to eliminate vignetting.

Installation :

- Put this product in an XD Mount so that **Guide A** of this product is coupled to **Guide A** on the XD Mount.
- Rotate this product clockwise until **Guide A** of this product is coupled to **Guide B** on the XD Mount where you should feel and hear clicking.
- Pressing the "lock lever" of the XD Mount to unlock this product, rotate this product in the reverse direction to separate from the XD Mount.

Remarks of Installation

This product is equipped with a strap eyelet on the mount. (A)

When installing, make sure the strap eyelet is positioned at the "bottom" of the housing when locked. (C)

If not, an optical cable for an external strobe attached to a housing (especially TG series housing) may interfere with the strap eyelet resulting in an incomplete lock of XD Mount.

Strap eyelet

Incomplete lock due to interference with a cable.

Proper strap eyelet position when locked

- Lens installation :**
- Refer to respective user manual. **Apply thin film of grease on the threaded part of this product** to prevent salt build-up causing anchoring of the combined lens.
