**UWL-95S M67**

**If you have any difficulty to unscrew fixing screw(s) due to salt-build-up etc, do not proceed any further and consult your purchasing dealer for advice**

Should you damage fixing screw(s), the original lens mount may not be separated from the lens. Please consult your purchasing dealer for advice

b) **Put grease in the screw holes**

Apply grease (**supplied with an underwater case**) in six screw holes to avoid anchoring of the fixing screws.

c) **Attach “XD Male Bayonet”**

Put the “XD Male Bayonet” on the lens barrel so that screw holes both on the “XD Male Bayonet” and lens barrel are matched.

Then fasten them with supplied M2x5 fixing screws by using supplied hex wrench by making star pattern to tighten them evenly. **DO NOT** overtighten or tighten unevenly not to damage the lens itself.
