- X-2 for EOS50D/40D, X-2 for EOS60D, X-2 for EOS70D, X-2 for EOS80D

Installation method :

- Set focus mode switch of the lens to 「AF」 position and adjust the zoom ring for minimum lens extension.
- Put the Zoom Gear 18-55 II on the lens barrel and lightly press to the direction indicated by an arrow in the right image until it stops.

Make sure to press the Zoom Gear straightly against the lens barrel.

As in the above image, there must be 7mm gap between the bottom surface of the Zoom Gear and the lens mount surface, and both surfaces must be parallel.

- The Zoom Gear 18-55 II is fixed on the lens barrel by pressure molding of pre-installed O-ring snips on inner side of the Zoom Gear. You may have difficulty to install the Zoom Gear due to individual variety of space between the gear and the lens. In this case, take out and cut off O-ring snip(s) little by little to adjust pressure of O-ring snip(s). DO NOT cut off O-ring snips(s) too much or you can not fix the Zoom Gear tight enough.

Handling precautions :

- Please note that lens manufacture has no concern with installation of this product on lens. Do not inquire lens manufacture about the installation. Also please note that you have to take full responsibility for the installation.
- INON Inc. can not take any responsibility for any trouble/damage(damage to lens/lens accessories/camera) resulting from the installation.
- Should you have trouble like flooding caused by the installation, INON Inc. can not take any responsibility for incidental damage (relevant expense to take a shot etc.)
- Please perform the installation only if you can accept above conditions.
