INON Color Filter LF-N Set

Thank you for purchasing INON product.

INON Color Filter LF-N Set is for compatible INON LED flashlight product to change color tone of the light beam. **This product is designed for underwater use only and not usable on land.**

Features

- Change color tone of compatible LED flashlight product with "Red Filter LF-N" not to scare shy subject or "Blue Filter LF-N" to calibrate color best suited as constant light for underwater imaging.
- The "Filter Holder LF-N" has screw mount on its front end to stack optional 「Condenser Lens LF-N」 to have even closer working range and narrower beam in combination with filter effect.

Package includes :

- Filter Holder LF-N ① x 1
- Red Filter LF-N ② x 1
- Blue Filter LF-N ③ x 1
- This User Manual

Compatible product,:
(as of December 2014)

- INON 「LF800-N」

Preparation :

- This product is used as a combination of 「Filter Holder LF-N」 and 「Red Filter LF-N」 or 「Blue Filter LF-N」.
- To install 「Red Filter LF-N」 or 「Blue Filter LF-N」 on 「Filter Holder LF-N」, just snap either filter on inside of the male screw on the back of the 「Filter Holder LF-N」 as shown below (A). Check and confirm that the filter is completely and firmly seated in the position.
- To remove 「Red Filter LF-N」 or 「Blue Filter LF-N」 from 「Filter Holder LF-N」, push it out by your finger from front side (female screw side of the holder).

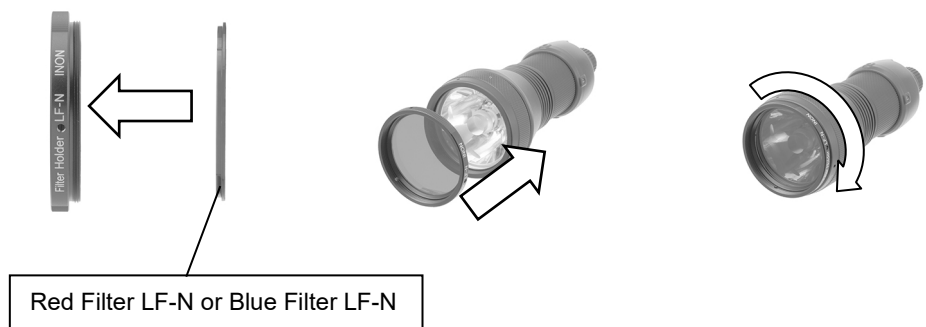

Installation Method :

- Apply a little amount of grease (supplied with compatible LED flashlight) on the male threaded part of the 「Filter Holder LF-N」 to prevent anchoring by salt build-up or electrical erosion between the 「Filter Holder LF-N」 and combined LED flashlight.
- Screw on the front of the compatible LED flashlight (B)(C). It is recommended to attach underwater or partially unscrew and retighten underwater to escape bubbles trapped between the lens and LED flashlight surface.
